DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Dutcher.

Dutcher discloses the claimed invention, including an airfoil shaped drag reduction element (Fig. 17) which is rotatable about an elongated member, and may be locked in any desired position.

Re “for a small watercraft with fin and sail”, such is a statement of intended use, carrying little to no weight in the claim.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bourn and Yerby et al. disclose rotatably supported drag reduction elements.
